

## Small Animal Lecture

Lisa M. Freeman, DVM, DACVN, PhD (Morning 4 hour Segment)

*Dr. Freeman is a boarded nutritionist. She specializes in clinical nutrition, nutritional modulation of cardiac disease, critical care nutrition, & obesity. She has recently been chosen by AAHA along with 4 other boarded nutritionists to lead the development of new nutritional guidelines for pet foods. She is at the forefront of small animal nutritional well being. Topics will include:*

- Supplements
- Enteral Nutrition
- Talking to owners about pet food
- Unconventional diets.

## Large Animal Lecture

Carlos Gradil, LMV, MS, PhD, DACT (Afternoon 2 hour Segment)

*Dr. Gradil's specialties include: Breeding management, artificial insemination with fresh, chilled and frozen semen, transcervical insemination, breeding soundness evaluation, collection and processing of semen for shipment, semen cryopreservation (freezing), and pregnancy diagnosis.*

*He finds satisfaction in his fieldwork because it creates the opportunity to produce desirable offspring, relieve infertility and resolve difficult parturition. Dr. Gradil's honors include awards from US-AID, NATO, and the Veterinary Honor Society. He has also been a Fulbright fellow and a Rockefeller Fellow.*

*His Topics will include:*

- How to manage Dystocia's and emergencies in post foaling mares.*
- All Aspects of the Stallions Role in Reproduction.*
